

## High Speed Rewinding Machine

High speed rewinding machine is our 2018 new model for very high speed rewinding production of food cling wrap film. it is working for both PVC cling film and PE food stretch wrap film.

The machine designed for 5 turrets changing for paper core. it is with non-stop rewinding when changing the paper core. it can improve the production 30% higher than the previous model. At the production, it can easily making 12-14 rolls per minute for consumer roll length set at 20-30 meters.

The machine is with option for perforation line device, it can make the tearing off for the film easily from the roll without a plastic blade cutter.

With the most smart device program in this machine, it only requires one operator for loading paper core, and collecting the ready products from the conveyer to pack into box.

### **Main profile:**

Material PVC/PE food cling wrap

Master reel width max450mm  
Master reel inner core diameter 3inch  
Master reel outer diameter max 500mm  
Product width same to mother reel  
Product inner core diameter 30/35/38/40mm etc  
Product length set 10-200meters  
Speed max 14rolls/minute  
Power request 4.5kw  
Air request 0.2Mpa  
Voltage 220/380/415/450v
