

## Physiotherapy Electrode Slice Packing Machine

Physiotherapy electrode slice packing machine mainly used to automatic of the production of disposable physiotherapy electrode slice sheets (non-woven fabric). It is equipped with automatic cutting, adding liquid and packaging, and it is fully automatic.

The development of this machine can change of the traditional manual process of bagging products and sealing the manual sealing machine, save the labor cost, reducing production cost and improving product quality.

### **Production Process:**

Non-woven fabric and packaging film machine → non-woven liquid addition → cutting → conveying → secondary liquid addition → into the bag → four-side sealing packaging → output packaged finished products.

### **The main technical parameters:**

Specification Model: PPD-DJP

Unfolded size of non-woven sheet: length 90mm × width 60mm

## JIAXING PPD PACKAGING MACHINERY CO LTD

www.rewindingmachinery.com E-mail: eng@rewindingmachinery.com

Tel: +86-573-82571515 Whatsapp/Wechat: 0086 137 3685 9272

Bag size: length 160mm × width 115mm

Processing capacity: 30-50 bags / min

Packaging film material: 73-110g/m<sup>2</sup> paper aluminum film composite wrapping paper

Packaging film specifications:  $\Phi \leq 350$  mm, width 262 mm, paper core inner diameter 76.2mm

Applicable wet wipes raw material: coiled, 100-200g/m<sup>2</sup> non-woven fabric

Non-woven material specifications: diameter  $\leq 600$ mm, width 60mm

Raw material core diameter:  $\Phi 76.2$ mm (=3")

Total power: 220v, 50hz, 2.6 kw

Equipment weight: 700 kg

Dimensions: length 5500 × width 1000 × height 1500mm

Packing size: length 2400 × width 1900 × height 1800mm
